

Profession Joiner

Results Summary MYSKILLS

Name:

Date of birth:

Test date: 10.02.2020

Test language: English

The test covers practical occupational knowledge in six main areas of expertise for a joiner. The testing is completed by asking questions relating to typical occupational situations, via a PC. The areas of expertise and situations are derived from the prescribed training regulations and curricula. The results follow:

Practical professional knowledge

●●●● High
●●●○ Average to high level

●●○○ Average
●○○○ Not provable, to average

○○○○ Not provable

Manufacturing products on woodworking machines

Selecting the tools required for various materials and machines. Sawing, planing, milling and grinding simple products. Setting up, caring for and maintaining the machines.

Manufacturing and assembling simple products in single-item production

Manufacturing simple products according to the client's requirements. Preparing sketches, researching the required materials, and determining connections. Processing and assembling wooden components.

Coating, lacquering and finishing surfaces

Coating surfaces so that they are visually appealing and protected from environmental damage. Veneering, staining, glazing and lacquering.

Dismantling and assembling furniture

Dismantling and disposing of furniture. Transporting premanufactured furniture to the client and installing it professionally. Using simple hand-operated and small machinery for this procedure.

Dismantling and assembling construction elements

Transporting premanufactured building components, such as windows, to the building site and assembling them. Using simple hand-operated and small machinery for this procedure.

Carrying out maintenance and servicing work

Determining the type and scope of protective measures, differentiating between chemical and construction-based wood protection. Caring for, maintaining and repairing wooden products.

Results Summary MYSKILLS

Notes on test content

The test consists of 100 questions on typical practical on-the-job situations. At least 20 questions are posed in a closed question format, per field of expertise. The test may take up to 4 hours. The test was developed by experts in various fields. The sub-division into various fields of expertise is oriented along the curricular content of the professional education and training, as well as occupational situations in practice. Practical job situations are represented via text, pictures and videos.

Notes on the interpretation of the results

The test covers practical professional knowledge, by posing questions regarding typical on-the-job situations and challenges.

This cannot be tested:

- Practical application and methodological competence
- Problem-solving skills
- Motivation, self-motivation and/or social skills
- German language skills
